

Bicycle/Pedestrian Facility Near Route 123 & I-495 in Tysons

VDOT is designing a bicycle/pedestrian facility in the vicinity of Route 123 and I-495 in Tysons.

Following successful community participation in 2015 and 2016, two design alternatives were selected. The project team is seeking additional input on these two options:

Option 1: Shared-use trail along Route 123 from the Old Meadow Road intersection (east of I-495) to Westpark Drive near the ramp to the Express Lanes along I-495

Option 2: Shared-use trail along Old Meadow Road from Route 123 to a bridge crossing over I-495 to Tysons One Place

The shared-use trail will be constructed as a 10-foot-wide asphalt trail with bridge segments. Community input is requested on the selection of a preferred option.
